**SUBJECT:** Proposal for an interdisciplinary M.S. and Ph.D. in Biorenewable Resources and Technology

The Council on Academic Affairs and the Faculty Senate Curriculum Committee (FSCC) have approved the proposal for an interdisciplinary graduate major (M.S. and Ph.D.) in Biorenewable Resources and Technology. The proposal is found on the FSCC web page (26 page pdf file) at:

<http://www.public.iastate.edu/~catalog/fscc/homepage.html>

The M.S. and Ph.D. majors would receive education and training in biobased products. The major would require core courses and core elective courses. Laboratory courses have been developed with support from the NSF. Core elective courses come from a range of departments and colleges.

The proposal needs Faculty Senate and Regents approval.
